[Top of page](#)

See **Regular Service Intervals: Buell Models**. This Owner's Manual contains your new motorcycle warranty and a maintenance record.

The maintenance record is a scheduled mileage interval that contains a specific maintenance checklist for upkeep of your motorcycle. It is the owner's responsibility to follow the scheduled mileage intervals as specified. All of the specified maintenance services must be performed to keep your warranty valid.

1. Make an appointment with a Buell dealer for inspection and service prior to first 620 miles 1000 kilometers .
2. Bring this Owner's Manual with you when you visit the dealer to have your motorcycle inspected and serviced.
3. Have the owner record stubs dated and signed for required proof of service during the warranty period.
4. Keep receipts covering any parts, service or maintenance performed.

These records should be transferred to each subsequent owner.

⚠ WARNING

Do not use aftermarket parts and custom made front forks which can adversely affect performance and handling. Removing or altering factory installed parts can adversely affect performance and could result in death or serious injury. (00001a)

Use only Buell approved parts and accessories. Use of certain other manufactures performance parts may void your warranty. See a Buell dealer.

Buell dealerships are independently owned and operated and may sell parts and accessories that are not manufactured or approved by Buell. Therefore, you should understand that we are not and cannot be responsible for the quality, suitability, or safety of any non-Buell part, accessory or design modification, including labor, which may be sold and/or installed by our dealers.

Keeping It All Buell

[Top of page](#)

Insist that your dealer uses only Genuine® Buell replacement parts to keep your Buell motorcycle and its warranty intact.

NOTE:

Installing off-road or competition parts to enhance performance may void your new motorcycle warranty. See a Buell dealer for details.

CAUTION

It is possible to overload your motorcycle's charging system by adding too many electrical accessories. If your combined electrical accessories operating at any one time consume more electrical current than your vehicle's charging system can produce, the electrical consumption can discharge the battery and cause vehicle electrical system damage. See a Buell dealer for advice about the amount of current consumed by additional electrical accessories, or for necessary wiring changes. (00249b)
